A FINE-GRAIN LOOK, LIKE MUD OR CLAY, FOR ULTRA-FLAT
LIGHT-ABSORBING WALLS.

If you stick your hands in clay and let it dry and crack, or if you pull a wire through a lump of potter's clay you'll get an idea of a wall done in Sand paint. If you go hiking in a place like Sossusvlei in Namibia and you take a mud bath, the look of the sun-dried clay on your body would be just like this.

SAND PAINT
